

# Community Enrichment Series

## FALL 2026 PROGRAMMING MENU

Einnim Creative Studio provides turnkey, all-natural artisan programming for community centers, libraries, and park districts. Our "Clean Crafting" curriculum is designed to foster creativity, mindfulness, and hands-on learning using 100% plant-based materials. We handle all logistics—from professional setup to final cleanup—making high-quality art programming accessible for any venue.

## PROGRAMMING LOGISTICS

### OPERATIONAL SPECIFICATIONS

<b>Ages</b>	Customizable for Youth (8+), Teen, Adult, or Senior populations.
<b>Duration</b>	60–90 Minutes per session.
<b>Format</b>	Available as a single-day workshop or a 4-week "Artisan Series" for deeper skill-building.

## FALL BOTANICAL & SCULPTURAL SERIES

### The Art of Wax-Dipped Foliage

#### *FOCUS: FINE MOTOR SKILLS & BOTANICAL STUDY*

Participants explore the properties of plant-based waxes through a unique "cold-dip" sculptural technique. This session focuses on replicating the colors of the Midwest harvest, hand-forming translucent leaves and berries to create a permanent, nature-inspired centerpiece.

**Key Learning:** Wax temperature management, color blending, and organic composition.

## Gilded Wire & Enamel Botanicals

*FOCUS: MIXED MEDIA & JEWELRY BASICS*

An introductory course in wire-shaping. Students learn to manipulate jeweler's wire into intricate leaf "skeletons," which are then finished with high-pigment autumn enamels. This program is highly popular for teen "Maker" tracks and adult creative workshops.

**Key Learning:** Surface tension techniques, wire gauges, and LED curing.

## Pressed Leaf Glass Preservation

*FOCUS: NATURE CONSERVATION & DESIGN*

A modern take on the traditional herbarium. Participants learn the proper techniques for pressing and preserving local autumn foliage (Oak, Maple, Ginkgo) and how to arrange them in minimalist, double-pane glass panels for home display.

**Key Learning:** Moisture control in botanicals and visual balance.

## Hand-Built Harvest Clay Vessels

*FOCUS: TACTILE EARTH ART*

A grounding pottery experience using air-dry clay. Guests utilize real autumn textures—stems, burlap, and dried pods—to imprint designs into functional mini-gourds, pumpkin ring cones, or incense holders that dry naturally without a kiln.

**Key Learning:** Texture transfer, slab-building, and structural integrity.

## The Apothecary Kitchen: Simmer Jars & Bath Rituals

*FOCUS: SCIENCE OF SCENT & HOME TRADITIONS*

A two-part wellness series. Part one focuses on "Simmer Jars" using dehydrated fruits and spices for natural home fragancing. Part two explores the benefits of mineral salts and essential oils like Cedarwood and Amber for seasonal self-care.

**Key Learning:** Essential oil profiles, aromatherapy basics, and natural preservation.

## CORE PROGRAMMING (AVAILABLE YEAR-ROUND)

---

- **Soy Candle Artistry:** The science of clean-burning wax, wick selection, and custom scent blending.
- **Cold-Process Soap Making:** A deep dive into traditional soap-making using organic botanicals and clay colorants.
- **Botanical Perfume Lab:** Learning the architecture of scent, including top, middle, and base notes.
- **Mindful Sage & Incense:** The history and craft of traditional aromatic bundles and hand-formed cones.

- **Lotion & Body Butter Crafting:** An exploration of natural emollients, whipping techniques, and skin-safe botanicals.
